

# expertise in seed pathology... supporting the industry

## Our services & expertise:

### Reference material\*\*

- Pest inocula
- Pest isolates
- Control seeds and differential seeds

For creating new plant varieties, assessing treatment efficiency, quality control, research...

### Expertise

- AFSIS and customised training
- Experiment days, workshops
- Customised support for laboratory projects
- Laboratory audits
- Coordination and partners for research projects
- Epidemiological studies
- Development of new pathosystems

For all actors involved in plant health

\* incl. those in quarantine  
\*\* incl. MATREF and RESISCOLL

## Expertise in Phytopathology

For all actors involved in plant health

Internationally recognised expertise across genes, seeds & plants

supporting public policies and the industry for all cultivated species

The GEVES teams are at your service, if you have any questions or need further information, please contact us at:

GEVES - Groupe d'Étude et de contrôle des Variétés Et des Semences  
25 rue Georges Morel - CS 90024 - 49 071 BEAUCOUZE cedex - FRANCE  
pathologie@geves.fr - +33 (0)2 41 22 58 00 - www.geves.fr
